

A Smoke Free Life

Nevada Cancer Institute offers a smoking cessation program targeted at reducing the number of smokers throughout Las Vegas.

This program is two-fold, offering general smoking education classes, as well as a more intense smoking cessation course. The smoking cessation course is designed to help individuals make decisions, show them how to prepare for the changes, help implement the changes, and show them how to cope with the difficulties that may affect the individuals and their loved ones.

Hope thrives in the desert

Classes to be offered at:

Nevada Cancer Institute
